

StrataLight Announces World's Smallest 40Gbps Module

The OTM-400 offers the field proven StrataLight 40G/43G VSR client interface in the industry's smallest form factor.

LOS GATOS, CA – March 27, 2007 – StrataLight Communications, Inc., the global leader in 40 Gbps system deployment today introduced a new 40G/43G 300 pin MSA Optical VSR module, the OTM-400.

The OTM-400 is the next generation of 40G/43G VSR module and offers industry-leading size and power consumption. StrataLight Communications has offered this client optical interface as part of the OTS-4000 product family of 40 Gbps DWDM sub-system transponders since 2004. StrataLight continues to lead the fast growing 40G market with wide scale carrier and OEM adoption of its products. The OTM-400 module is the newest addition to StrataLights' field proven carrier class 40G solution.

The module provides a serial 40/43Gbps optical interface for interconnection of OC-768, STM-256 and G.709 OTU-3 clients over distances up to 2km over single mode fiber. The OTM-400 is fully standards-compliant with the OIF SFI-5 electrical interface requirements and with the ITU-T G.693 optical interface specification. The package size of 4" x 5" is less than 60% of the current industry standard. Interoperability with Core Routers and DWDM system offering OC-768 has been extensively tested in many carrier laboratories and in live production networks.

The OTM-400 module will be available for sampling in May and generally available in July 2007.

About StrataLight

Located in the heart of Silicon Valley in the San Jose Bay Area in California, StrataLight Communications is the global leader in commercial deployment of ultra high capacity optical transmission sub-systems with line rates in excess of 40Gbps. StrataLight Communications enables service providers to address the growing demand for bandwidth driven by IP converged services using their existing fiber network infrastructure. Our products are sold to service providers by optical networking OEM partners. For more information, visit www.StrataLight.com.
